

A Clinical Trial for
Non-Small Cell Lung Cancer
that has Spread Outside
the Lungs

Have you been diagnosed with Non-Small Cell Lung Cancer?

**You may qualify for a clinical trial for patients with this type
of lung cancer.**

What is the purpose of this trial?

This trial is trying to find out if the investigational trial drug, MK-2870 [sacituzumab tirumotecan (sac-TMT)], plus pembrolizumab may work to help stop or slow down the spread of your NSCLC, compared to pembrolizumab alone.

Can I join this clinical trial?

There are certain rules that you must meet to be able to join this trial. If you would like to learn more about our clinical trial, including the possible risks and benefits of trial participation, please discuss your interest with your doctor.

To learn more about this study, such as who can join,
and the possible risks and benefits of joining, you can:
